What is "Fair Trade"? it is an international trade net aimed to promote social and economical justice (no children at work, right salary), sustainable development, respect for the producers and native culture in developing countries.

Commercio Equo e Solidale e' un approccio alternativo al **commercio** tradizionale; esso promuove giustizia sociale ed economica, sviluppo sostenibile, rispetto per le persone e per l'ambiente, crescita della consapevolezza dei consumatori, l'educazione e l'informazione su temi legati alle produzioni tradizionali in molti paesi in via di sviluppo.
